Module 5.2 Assignment

02/08/2026

To fulfill the **Atomic Design** requirements for style guide, I have organized a professional medical theme into a table. This structure demonstrates that I am not just picking colors but building a functional system for the website.

Dr. Ahmadur Rahman bioSite: Pattern Library (Atoms & Molecules)

Level	Component	Details / Specifications
Atom	Primary Color	Trust Blue (#0056b3) : Used for high-level branding and primary buttons.
Atom	Secondary Color	Healing Teal (#008b8b) : Used for accents and secondary UI elements.
Atom	Typography	Heading : <i>Roboto</i> (Bold). Body : <i>Open Sans</i> (Regular) for readability.
Atom	Iconography	Medical-themed line icons (Stethoscope, Location Pin, Camera).
Molecule	Primary Button	Combined Trust Blue background with White Open Sans text.
Molecule	Nav Link	Combined Open Sans text with a Teal hover effect.
Molecule	Search Bar	Combined a text input "Atom" with a Blue search icon "Atom."
Organism	Site Header	Combined Logo, Navigation Molecule, and the Portrait "Atom."

1. Landing Page Wireframe

Concept: *Professional story + timeline of growth*

Page Structure (Atomic Design Mapping)

- **Atoms:** Logo, Nav links, Headline text, Images, Captions
- **Molecules:** Nav bar, Hero text block, Image + bio cards
- **Organisms:** Header, Hero Section, Accomplishment Grid
- **Template:** Landing Page
- **Page:** Dr. Rahman – Expanding Care

Wireframe

Headline:

“Expanding Care to the Community”

Subtext (optional):

Board-certified care, now closer to home

ACCOMPLISHMENTS / TIMELINE GRID (Organism)

IMAGE	IMAGE	IMAGE
Residency Photo	Board Cert. Badge / Photo	New Location Opening Photo
Newark Beth Israel	Board-Certified Physician	Wexford Terrace Suite
Short bio	Short bio	Short bio

So, It Feels Medical + Trustworthy

Hero Image

- Bright, natural lighting
- Real clinic exterior or interior
- No stock-photo vibes

Accomplishment Cards

short, factual, confidence-driven:

- 1–2 lines max

- Dates optional
- No marketing fluff

Example: *Completed Internal Medicine Residency at Newark Beth Israel, building a foundation of evidence-based patient care.*

BioSite Interview Questions: Dr. Ahmadur Rahman

1. **Early Inspiration:** What first inspired you to pursue a career in medicine while we were growing up?

Early Inspiration

Growing up, I was inspired by how physicians were trusted pillars in the community. I saw early on how much impact a doctor could have simply by listening and showing compassion, and that stayed with me as I chose my path.

2. **Medical Journey:** Can you describe the transition from your doctorate at Ross University to completing your residency at Newark Beth Israel?

Medical Journey

My education at Ross University gave me a strong academic foundation, but residency at Newark Beth Israel is where I truly became a physician. It was a demanding and formative experience that shaped my clinical judgment, resilience, and commitment to patient-centered care.

3. **Specialization:** What drew you specifically to Internal Medicine and Primary Care?

Specialization

Internal Medicine and Primary Care allow me to treat the whole person rather than just a single condition. I value long-term relationships with patients and being a consistent, trusted guide in their healthcare journey.

4. **Daily Mission:** What is the most rewarding part of serving your patients in both Manhattan and Jamaica Queens?

Daily Mission

Serving patients in both Manhattan and Jamaica Queens is deeply rewarding. Being able to provide accessible, high-quality care across different communities—and closer to where patients live—keeps me motivated every day.

5. **Professional Philosophy:** Patients mention your "warm aura" and attentive care; how do you approach building trust with someone on their first visit?

Professional Philosophy

I believe trust begins with presence and listening. On a patient's first visit, I focus on creating a calm, respectful environment where they feel heard and understood. Clear communication builds confidence and lasting relationships.

6. **Outdoor Life:** When you aren't at the practice, what kind of outdoor activities do you find most rejuvenating?

Outdoor Life

Spending time outdoors helps me recharge. Whether it's walking, being active, or simply enjoying open spaces, it brings balance and mental clarity outside of a busy clinical schedule.

7. **Perspective through the Lens:** You have an interest in photography—what subjects do you find yourself drawn to capturing the most?

Perspective Through the Lens

Photography is a creative outlet for me. I'm drawn to everyday moments, natural light, and scenes that tell quiet stories—much like medicine, it's about observation and perspective.

8. **Travel Experiences:** Out of all the places you've traveled, which destination had the biggest impact on your worldview?

Travel Experiences

Travel has broadened my worldview and reinforced the importance of cultural awareness. Experiencing different places and people strengthens empathy, which carries directly into patient care.

9. **Balancing Act:** How do you manage the demands of running two private practices while making time for family and personal hobbies?

Balancing Act

Running two private practices requires structure and strong teamwork. I'm intentional about managing my time so I can remain fully present for my patients while also prioritizing family and personal interests.

10. **Future Goals:** What are your primary goals for your medical practice or personal life over the next five years?

Future Goals

Over the next five years, my goal is to continue growing my practices as trusted community healthcare centers while maintaining balance, fulfillment, and continued personal growth.

Biography: Dr. Ahmadur Rahman, MD

Dr. Ahmadur Rahman is a board-certified internist and primary care physician dedicated to providing thorough, compassionate medical care to diverse communities across New York. Serving patients through his private practices in both Union Square, Manhattan, and Jamaica Queens, Dr. Rahman has built a reputation for a "warm aura" and a bedside manner that prioritizes genuine patient connection and healing.

His journey into medicine began with a Doctor of Medicine from Ross University School of Medicine, followed by a rigorous Internal Medicine residency at Newark Beth Israel Medical Center. This extensive training prepared him to manage a vast spectrum of health concerns, from acute issues like infections and respiratory distress to the long-term management of chronic conditions such as diabetes, hypertension, and heart disease. Dr. Rahman's clinical approach is rooted in the belief that primary care is the cornerstone of a healthy society, offering everything from annual physicals to specialized screenings that catch potential issues before they escalate.

Beyond the stethoscope, Dr. Rahman finds balance through a deep appreciation for the world around him. When time permits, he is an avid traveler and photographer, capturing the unique textures and stories of the places he visits. Whether he is exploring the outdoors or spending quality time with his family, these personal pursuits inform his empathetic approach to medicine, reminding him that every patient has a unique story worth telling. He remains committed to expanding his reach, recently opening a new location in Jamaica Queens to ensure high-quality healthcare is accessible to all.

1. Portrait (About Page)

- **Image:** Dr. Ahmadur Rahman in his professional medical attire.

- **Caption:** Dr. Ahmadur Rahman, a board-certified internist, brings a patient-centered approach to his dual practices in Manhattan and Queens.

2. Accomplishments & Goals (Landing Page)

- **Accomplishment 1:** A view of Dr. Rahman's clinical examination room.
 - **Caption:** Establishing private practices in two of New York's busiest boroughs allows Dr. Rahman to provide accessible primary care to a wide demographic of patients.

Goal/Future: Dr. Rahman at a global landmark (United Nations).

- **Caption:** By traveling to international hubs of cooperation like the United Nations in Switzerland, Dr. Rahman continues to broaden his perspective on global health and community welfare.

3. Hobbies & Inspiration (Hobbies Page)

- **Hobby 1:** Travel photography of the Blue Mosque in Istanbul.
 - **Caption:** Travel and photography allow Dr. Rahman to decompress and find artistic inspiration in historic architecture, such as the iconic Blue Mosque in Turkey.

Accomplishment 2: Dr. Rahman engaging with his family and community.

- **Caption:** Beyond clinical success, Dr. Rahman views his role as a family man and community leader as his most significant personal achievement.

Hobby 3: A detailed shot of a cucumber growing on the vine.

- **Caption:** Focusing on the small details of organic gardening reflects the same thoroughness and care Dr. Rahman applies to diagnosing and treating his patients.

Hobby 2: A bountiful harvest of home-grown cucumbers and zucchini.

- **Caption:** Gardening serves as a peaceful retreat from the fast-paced medical world, allowing Dr. Rahman to focus on patience and the rewards of steady growth.
